Profile

A results-driven Software Engineer with over 3 years of experience in architecting, developing, and deploying robust, full-stack web applications. Proven expertise in building scalable backend systems with PHP (Laravel, Symfony) and leveraging modern JavaScript for dynamic frontends. Adept at performance optimization, Linux server administration, and designing efficient database schemas. Passionate about applying software engineering principles to solve complex problems and contribute to high-performing technical teams.

Work Experience

Web Application Developer

Apr 2023 – Dec 2024

Accessworld Tech Pvt. Ltd, Lalitpur, Nepal

- Engineered and maintained full-stack web applications using PHP (Laravel, Symfony) and JavaScript, significantly improving user experience and code maintainability.
- Designed and launched a multi-tenant SaaS platform for cloud service purchases, resulting in a 30% increase in process automation and user engagement.
- Deployed and optimized Linux-based web servers, enhancing application scalability and achieving a 20% improvement in system uptime.
- Refactored and optimized legacy codebases, which improved overall system performance and reduced application load times by 25%.
- Liaised directly with clients from BFI and educational sectors to gather requirements and deliver customized, high-value solutions.

Backend Developer

Nov 2021 – Apr 2023

Tech 101 Pvt. Ltd, Kathmandu, Nepal

- Contributed to the development of arkostore.com, a mobile exchange platform, by engineering the backend architecture and core API functionalities using Laravel.
- Developed and maintained backend services for web applications using Core PHP and Laravel, focusing on API performance and system stability.
- Designed and normalized relational database schemas (MySQL), optimizing queries to improve data retrieval performance by 20%.
- Engineered and managed RESTful APIs to facilitate seamless communication between web and mobile clients, reducing integration complexity by 15%.
- Conducted rigorous code reviews, enforcing best practices in security, performance, and code quality.

Software Engineer

Mar 2021 – Oct 2021

Red Tail Fox Pvt. Ltd, Kathmandu, Nepal

- Played a key role in the development of ramailogames.com, an online gaming platform, by implementing multiple payment gateways and converting the application into a Progressive Web App (PWA) for an enhanced, app-like user experience.
- Designed logical and physical database models, including ERDs, to serve as the foundation for new software systems.
- Developed custom Python scripts for web scraping and data processing, transforming unstructured data into valuable client assets.
- Contributed to the backend development of an e-sports tournament platform and a video streaming service using Laravel and Symfony.
- Implemented systematic testing and debugging protocols, authoring detailed reports to track and resolve software defects.

Projects

Cloud Services & Hosting Automation Portal | PHP, Laravel

- Architected a self-service portal for customers to purchase and manage cloud products, including domain registration, cPanel hosting and automated VM provisioning via a vSphere client connection.
- Engineered a centralized payment system with a user-loadable credit wallet, enabling seamless transactions and billing across all integrated services.
- Automated the entire customer lifecycle, from real-time domain availability checks to the automatic provisioning of cPanel accounts and other cloud services upon purchase.
- Implemented a Single Sign-On (SSO) authentication system to provide unified, secure access across the multi-product platform.
- Live URL: <https://portal.awt.cloud>

Data Center Visit Management System | PHP, Laravel

- Maintained and enhanced a mission-critical system for scheduling and managing secure access to data center facilities.
- Engineered a robust, multi-level approval workflow, reducing manual intervention and improving the efficiency of the visit request lifecycle.
- Executed performance optimizations and critical bug fixes to ensure high system availability and reliability for a 24/7 operational environment.

Education

- **Bachelor of Engineering (Honors) in Computing (Software Engineering)** Sep 2017 – Dec 2020
University of Northampton, Northampton, United Kingdom

Professional Development & Certifications

Certificate in Safety, Health and Welfare at Work - (2025) *National Irish Safety Organization (NISO) & Technological University of the Shannon (TUS), Athlone*

Technical Skills

- **Languages:** PHP, JavaScript, Python, SQL
- **Frameworks & Libraries:** Laravel, Symfony
- **Databases:** MySQL, PostgreSQL
- **Tools & Technologies:** Linux Server Administration, RESTful APIs, Git, GitHub, Web Scraping, Docker, CI/CD, Postman
- **Project Management:** Trello, ClickUp
