SUMAN CHAULAGAIN

Software Engineer · PHP / Laravel · Linux

Kathmandu, Nepal · Open to remote work and relocation

sumchaulagain@gmail.com | linkedin.com/in/suman-chaulagain | github.com/Schaulagain | sumanchaulagain.info.np

PROFILE

Backend-focused software engineer with almost 4 years building production Laravel and Symfony applications. Most recently owned the payment system behind a cloud-services portal (eSewa, HBL), through which every purchase on the platform flowed. Comfortable from Livewire and jQuery front ends to Nginx, Apache and Linux servers; building DevOps skills through a Docker homelab.

SKILLS

Backend: PHP, Laravel, Symfony, Livewire, REST APIs, payment gateway integration (eSewa, HBL, IME Pay)
Frontend: JavaScript, jQuery, Livewire, HTML, CSS
Databases: MySQL, PostgreSQL
Infrastructure: Linux, Nginx, Apache, Docker, Tailscale, GitHub Actions, vSphere API, cPanel/WHM API
Also: Python, TypeScript, Git, Postman, Jira, ClickUp

EXPERIENCE

Career Break: International Relocation
Jan 2025 – Present

- Built a self-hosted Docker homelab and rebuilt my portfolio site with a CI deployment pipeline (see Projects).

Web Application Developer
Apr 2023 – Dec 2024

Accessworld Tech Pvt. Ltd · Lalitpur, Nepal

- Owned the **payment service** of a cloud self-service portal in a two-person backend team; every purchase (VPS, domains, endpoints, email) went through it.
- Integrated the **eSewa** and **HBL** payment gateways, handling transaction recording, gateway callbacks, payment verification and invoice generation.
- Designed and prototyped a reward-points system that let customers spend points on portal products.
- Built Laravel integrations with the **VMware vSphere API** to provision and modify customer VMs and show live VM stats on dashboards.
- Automated hosting, email and domain products via the **cPanel/WHM API**, email provider APIs and domain availability/pricing APIs.
- Added a multi-level approval workflow to a 24/7 data center visit management system.
- Deployed apps on Linux servers (Nginx, Apache); gathered requirements from banking and education clients.

Backend Developer
Nov 2021 – Apr 2023

Tech 101 Pvt. Ltd · Kathmandu, Nepal

- Developed and maintained backend services and REST APIs in Core PHP and Laravel for web and mobile clients.
- Built report generation and phone-selection logic for the admin portal of arkostore.com, a mobile phone exchange platform.
- Designed and normalised MySQL schemas, optimised slow queries and took part in code reviews.

Software Engineer
Mar 2021 – Oct 2021

Red Tail Fox Pvt. Ltd · Kathmandu, Nepal

- Integrated **eSewa** and **IME Pay** into ramailogames.com, an online gaming platform, and turned it into a PWA.
- Contributed to the backends of an e-sports tournament platform and a video streaming service (Laravel, Symfony).
- Wrote Python scripts for web scraping and data processing, and designed database models (ERDs) for new systems.

PROJECTS

Homelab
github.com/Schaulagain/my-homelab

Ubuntu Server 24.04 · Docker · Portainer · Pi-hole · Jellyfin · Tailscale

- Turned an old laptop into a headless server running Pi-hole (network-wide ad blocking), Jellyfin and Portainer in Docker, reachable remotely over Tailscale without opening router ports.

Portfolio Website
sumanchaulagain.info.np

Node.js · JavaScript · GitHub Actions · Cloudflare

- Terminal-style portfolio; a dependency-free Node.js build renders Markdown to static HTML, deployed via GitHub Actions.

EDUCATION

BSc (Hons) Computing (Software Engineering)
Sep 2017 – Dec 2020

University of Northampton · Northampton, United Kingdom
