PROFILE

Software engineer with almost 4 years of professional backend work, mostly in Laravel and Symfony, including the payment service of a cloud portal (eSewa, HBL). Now exploring IoT, self-hosted infrastructure and machine learning through side projects built with AI coding agents, where I design and review and the agents write most of the code.

SKILLS

Backend: PHP, Laravel, Symfony, Livewire, REST APIs, WebSockets, payment gateways (eSewa, Khalti, HBL, IME Pay)
Frontend: JavaScript, jQuery, Livewire, HTML, CSS
Databases: MySQL, PostgreSQL
IoT: ESP32, MQTT (Mosquitto), sensors and relays
Infrastructure: Linux, Nginx, Apache, Docker, Tailscale, GitHub Actions, vSphere API, cPanel/WHM API
Also: Python, TypeScript, Rust (learning), Git, AI coding agents (Claude Code), Jira

EXPERIENCE

Career Break: International Relocation
Jan 2025 – Present

- Building side projects with AI coding agents: an IoT pump controller, a payments store, a home server and my portfolio site.

Web Application Developer
Apr 2023 – Dec 2024

Accessworld Tech Pvt. Ltd · Lalitpur, Nepal

- Looked after the **payment service** of a cloud self-service portal as one of two backend developers. Every purchase (VPS, domains, endpoints, email) went through it.
- Integrated **eSewa** and **HBL**: recording transactions, handling gateway callbacks, verifying payments and generating invoices.
- Designed and built a prototype of a reward-points system where customers could spend points on portal products.
- Used the **VMware vSphere API** from Laravel to create and change customer VMs and show live VM stats on their dashboards.
- Automated hosting, email and domain products with the **cPanel/WHM API**, email provider APIs and domain availability/pricing APIs.
- Added a multi-level approval workflow to a 24/7 data center visit management system.
- Deployed apps to Linux servers (Nginx, Apache) and gathered requirements from banking and education clients.

Backend Developer
Nov 2021 – Apr 2023

Tech 101 Pvt. Ltd · Kathmandu, Nepal

- Built and maintained REST APIs in plain PHP and Laravel for web and mobile apps.
- Built report generation and phone-selection logic for the admin portal of arkostore.com, a mobile phone exchange platform.
- Designed MySQL schemas, sped up slow queries and reviewed code.

Software Engineer
Mar 2021 – Oct 2021

Red Tail Fox Pvt. Ltd · Kathmandu, Nepal

- Integrated **eSewa** and **IME Pay** into ramailogames.com, an online gaming site, and turned it into a PWA.
- Worked on the backends of an e-sports tournament site and a video streaming service (Laravel, Symfony).
- Wrote Python scripts for web scraping and data processing, and drew up database designs (ERDs) for new systems.

PROJECTS

Water Tank Controller
github.com/Schaulagain/water-tank-controller

ESP32 · MQTT · Laravel · Livewire · Reverb · Docker · built with Claude Code

- Fills the roof tank by itself, keeps the pump safe through power cuts, and shows live levels on my phone.

Laravel Nepal Payments
github.com/Schaulagain/laravel-nepal-payments

Laravel 13 · PHP 8.4 · eSewa · Khalti · HBL · PHPUnit · built with Claude Code

- A store that only counts a payment once the gateway confirms the full amount, and invoices it exactly once.

EDUCATION

BSc (Hons) Computing (Software Engineering)
Sep 2017 – Dec 2020

University of Northampton · Northampton, United Kingdom
