PROFILE

Backend developer with almost 4 years of Laravel and Symfony experience. In my last role I looked after the payment service of a cloud portal (eSewa, HBL), which handled every purchase on the site. I also work on front ends with Livewire and jQuery, set up Linux servers with Nginx and Apache, and run a Docker server at home to learn more DevOps.

SKILLS

Backend: PHP, Laravel, Symfony, Livewire, REST APIs, payment gateway integration (eSewa, HBL, IME Pay)
Frontend: JavaScript, jQuery, Livewire, HTML, CSS
Databases: MySQL, PostgreSQL
Infrastructure: Linux, Nginx, Apache, Docker, Tailscale, GitHub Actions, vSphere API, cPanel/WHM API
Also: Python, TypeScript, Git, Postman, Jira, ClickUp

EXPERIENCE

Career Break: International Relocation
Jan 2025 – Present

- Set up a Docker server at home and rebuilt my portfolio site with automatic deployment from GitHub (see Projects).

Web Application Developer
Apr 2023 – Dec 2024

Accessworld Tech Pvt. Ltd · Lalitpur, Nepal

- Looked after the **payment service** of a cloud self-service portal as one of two backend developers. Every purchase (VPS, domains, endpoints, email) went through it.
- Integrated **eSewa** and **HBL**: recording transactions, handling gateway callbacks, verifying payments and generating invoices.
- Designed and built a prototype of a reward-points system where customers could spend points on portal products.
- Used the **VMware vSphere API** from Laravel to create and change customer VMs and show live VM stats on their dashboards.
- Automated hosting, email and domain products with the **cPanel/WHM API**, email provider APIs and domain availability/pricing APIs.
- Added a multi-level approval workflow to a 24/7 data center visit management system.
- Deployed apps to Linux servers (Nginx, Apache) and gathered requirements from banking and education clients.

Backend Developer
Nov 2021 – Apr 2023

Tech 101 Pvt. Ltd · Kathmandu, Nepal

- Built and maintained REST APIs in plain PHP and Laravel for web and mobile apps.
- Built report generation and phone-selection logic for the admin portal of arkostore.com, a mobile phone exchange platform.
- Designed MySQL schemas, sped up slow queries and reviewed code.

Software Engineer
Mar 2021 – Oct 2021

Red Tail Fox Pvt. Ltd · Kathmandu, Nepal

- Integrated **eSewa** and **IME Pay** into ramailogames.com, an online gaming site, and turned it into a PWA.
- Worked on the backends of an e-sports tournament site and a video streaming service (Laravel, Symfony).
- Wrote Python scripts for web scraping and data processing, and drew up database designs (ERDs) for new systems.

PROJECTS

Homelab
github.com/Schaulagain/my-homelab

Ubuntu Server 24.04 · Docker · Portainer · Pi-hole · Jellyfin · Tailscale

- An old laptop running Pi-hole (ad blocking for the whole network), Jellyfin and Portainer in Docker. I reach it over Tailscale, so no router ports are open.

Portfolio Website
sumanchaulagain.info.np

Node.js · JavaScript · GitHub Actions · Cloudflare

- A portfolio site that looks like a terminal. A small Node script turns Markdown into static HTML, and GitHub Actions deploys it.

EDUCATION

BSc (Hons) Computing (Software Engineering)
Sep 2017 – Dec 2020

University of Northampton · Northampton, United Kingdom
